

PROJECT REFERENCE

Decadex Roof Waterproofing to Admin Building Roof Phase I – Bangkok Patana International School

LIQUID PLASTICS Limited

The selection of Hammersmith and the **Decadex** Flat Roof Waterproofing System by Bangkok Patana School was as a result of the 10 year, extendable, warranty offered directly by Liquid Plastics to the Client.

The ability to extend the 10 year warranty by a further 10 years by simple cleaning and the application of an additional top coat gives the school a waterproof, maintenance free, roof for the next twenty years.

With over 40 years manufacturing experience and a formidable international track record the Decadex system from Liquid Plastics, supplied and applied by Hammersmith, was the only choice for the on-going roof repair and maintenance programme at this prestigious international school.

Client Patana International School
Project Details 1,200 m² of fiber reinforced liquid applied elastomeric roof membrane
Completion Date July, 2001

PROJECT REFERENCE

HAMMERSMITH

Bangkok Patana International School Phase II – Secondary School Roof

LIQUID PLASTICS Limited

Due to the outstanding success of the **Decadex FL10** system on Phase I, with no leakage or dampness noted during the 2001 wet season in the Administration Building, works commenced on the 4300m² Secondary School approximately nine months later.

Phase III works to the 3000m² Senior school are scheduled for commencement in the third quarter of 2002.
