

PROJECT REFERENCE

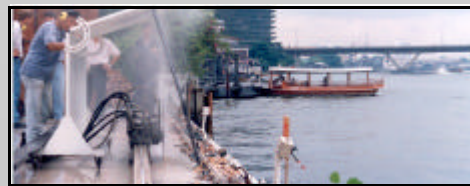

Controlled Demolition of Riverside Terrace Deck The Oriental Hotel Bangkok

Through a combination of its professional approach to difficult and demanding projects and the use of superior diamond cutting technology, Hammersmith was able to complete the controlled demolition of the decking slab to the riverside terrace at the famous Oriental Hotel Bangkok, on time and with minimum disturbance to residents

As an integral part of the refurbishment of the terrace the quick, quiet and efficient demolition of the existing structure was essential to the completion of the main contract works.

The use of specially designed 600, 900 and 1200 mm diameter "Silent center" wall saw blades from principal Messrs. *Wendt Longyear*, allowed all cutting works to be completed during normal working hours with almost no inconvenience experienced by the hotel residents.
