

Overhead Core Drilling - Second Stage Expressway

When drilling requirements are critical and access and implementation difficult, Hammersmith have the equipment and expertise to complete the job.

The Installation of overhead conduit brackets on Sector C of the Second Stage Expressway was contracted to Hammersmith based on the competence of the proposal put forward and the availability of specialist equipment to provide a workable solution

With access to both local and international expertise, back-up by *Boart Longyear*, (world leaders in diamond segment and cutting equipment technology), and an in house expertise in anchors and adhesive systems, Hammersmith can solve all of your specialist core drilling and dowel and starter bar anchoring requirements.
