

PROJECT REFERENCE

FULLY BONDED, INSULATED WELDED PVC MEMBRANE - SIKA THAILAND

With many years experience and tens of thousands of meters of traditional Sika Sarnafil successfully installed, Hammersmith were the obvious choice to install the newly launched Fully Bonded, Externally Insulated Sarnafil Roofing System on Sika's own factory in Chonburi, Thailand.

In addition to the installation of some 6,225m² of insulation and membrane and the machine welding of cover strips the project required significant detailing and innovative use of Sarnametal flashings and end caps and hand detailing around numerous roof penetrations.
